EXPERIENCE

2017 apr - present	Satbayev University IDET - Angular developer
2019 mar - 2020 avg	Hardcode - Angular developer(remote)
2016 apr - 2016 sep	KazPost - Programmer

PROJECTS

1. CRM System

The project was created using angular with "multiple application". Because project has many sub-projects. I managed a team of 3-5 people. In addition, I did coding, delegation and code review.

2. Drug expertise

My task was to display the recognized texts in the document and make navigation by coordinates. I did it with pdf.js library in angular.

3. Interactive Situation Centre

These are widgets that display interactive information such as tables, charts, and a map. In the development used angular 2+, svg, d3.js.
